

During the data science bootcamp I have learnt the language of python. This includes learning about the different modules python also have, scikit, pandas and spacy.

I am taking the skills bootcamp in data science where I will learn and specialise in the programming language of python. Python is a very powerful programming language which is used by companies such as amazon. By specialising in python i could take on specific roles for companies like marks and spencers which i found on indeed where programmers get paid more than £300 a day. This bootcamp has opened up opportunities and avenues which I would not have seen had I not taken on this challenge.

By doing this bootcamp it has opened up opportunities for me in the job world. I would like to work for a company where the work I do would make an impact not only on the company but for peoples lives on a day to day basis. As a person getting into programming and the working world I would apply to junior data science roles. This includes the NHS where I could be working with data on diseases or the government where I could be working on data with economics.

The screenshot shows a web browser window displaying the Indeed job search results for 'Junior Data Scientist' roles. The browser's address bar shows the URL: <https://uk.indeed.com/jobs?q=junior+data+scientist&l=&from=searchOnHP&vjk=67ed3a248d36f3cb>. The page features three job listings on the left and a detailed view of a 'Junior Data Scientist' role on the right.

**Senior Data Platform Engineer**  
GSK 4.1 ★  
Stevenage SG1  
Experience with specialized data architecture (e.g., data lake, lake house, data fabric, data mesh, optimizing physical layout for access patterns).  
Posted 30+ days ago

**Senior Data Scientist**  
Projecting Success  
London  
£50,000 - £65,000 a year  
Full-time  
Monday to Friday  
In-person  
Easily apply  
Responsive employer  
We are taking a lead role in driving transformational change into how projects are delivered and require a senior data scientist to help us to push new...

**Kafka Data Engineer**  
Lorien 3.1 ★  
Remote in London

**Junior Data Scientist**  
Jala Finance Ltd  
London EC4Y • Hybrid remote  
Permanent  
Apply now

- Advanced knowledge of SQL (joins, aggregations, CTEs and window functions)
- Good knowledge of Python, including popular Data Science packages (pandas, matplotlib, seaborn, numpy, sklearn)
- Familiarity with what is happening under the hood of popular Machine Learning algorithms
- Strong problem-solving skills and attention to detail
- Strong communication and collaboration skills
- Ability to work in a fast-paced, dynamic environment
- Eagerness to take initiatives and having the sense of ownership

**Nice to have:**

- Master's Degree in Data Science/Machine Learning or related discipline
- Knowledge of Deep Learning frameworks, ideally Keras/Tensorflow
- Familiarity with software version control (GitHub, bitbucket)
- Knowledge of Tableau
- Ability to comprehend research papers and possibly apply their solutions
